QUARTERLY BUSINESS REVIEW

GCG (US Hispanic) — Paid Media

Q3 FY2026 Business Review · June 2026 Performance

Google Ads · Meta · Azerion · Quantcast · Native

Reporting period: June 1–30, 2026 | Currency: USD | Prepared by Berelvant · 07.17.2026

berelvant

SUMMARY · BLENDED VIEW (ORGANIC + PAID)

Sessions rose 30% in June. The start-to-submit step is the constraint.

- June live applications rose 6% to 306 and submissions 7% to 322; the approval rate held at 45%.
- New funded held at 41 and new traded closed at 30. The fund step (28%) remains the gate to account growth.
- Working media reached $117,024 in June (+53% MoM), the biggest GCG month of 2026, with the Native pilot adding a fifth channel.
- Sessions grew 30% MoM on the paid scale-up while application starts stayed flat, so conversion, not volume, is the constraint.
- Q2 closed 14% below Q1 on blended applications while media scaled 5x: the dilution sits in the start-to-submit step, which the July funnel workstream targets jointly with the client team.

GCG — blended	Jan	Feb	Mar	Apr	May	Jun	MoM
Working Media Spend	—	$2,237	$49,106	$58,324	$76,274	$117,024	+53%
Unique Sessions	4,187	5,075	31,785	43,192	52,137	67,542	+30%
App Starts	2,306	1,871	2,820	2,767	2,617	2,590	-1%
Live Apps Submitted	430	344	391	398	289	306	+6%
Approved Clients	202	150	172	186	134	145	+8%
Approval Rate	46%	43%	42%	45%	45%	45%	0pp
New Funded Clients	58	46	44	65	40	41	+3%
Fund Rate	29%	31%	26%	35%	30%	28%	-2pp
Cost per Funded Client	—	$49	$1,116	$897	$1,907	$2,854	+50%
New Traded Clients	45	40	33	53	31	30	-3%
Cost per Traded Client	—	$56	$1,488	$1,100	$2,460	$3,901	+59%

Funnel metrics are blended organic + paid (client dashboard). Working media per the budget tracker. MoM = June vs May. January-February cost rows reflect a near-zero media base; the paid-era baseline starts in March.

Q3 FY2026 IN REVIEW · SPEND

Spend rose from $58K in April to $117K in June, with a fifth channel added.

Channel	Apr	May	Jun	Q3
Google Ads	$15,120	$15,201	$22,524	$52,845
Meta	$12,167	$12,243	$30,711	$55,121
Quantcast	$15,015	$22,359	$30,559	$67,933
Azerion	$16,021	$26,472	$29,586	$72,079
Native	—	—	$3,645	$3,645
Total	**$58,324**	**$76,274**	**$117,024**	**$251,621**

Month-over-month growth: +31% into May, +53% into June. June ran at 2x the April level.

READ

Q3 closed at $251,621 in working media, roughly 16% of the FY2026 budget; the program is at 19.35% of budget year to date.

The mix stayed balanced as it scaled: no channel above 27% of June spend, with search, social, and two programmatic lines all growing and the Native pilot launching as the fifth channel.

Paid social led June growth (+151%), followed by search (+48%) and the reach line (+37%).

Search and display carried the measured volume.

Channel	Apr	May	Jun	Q3
Google Ads	12	76	67	155
Azerion	76	43	58	177
Quantcast	2	8	15	25
Meta (pixel events)*	73	109	136	318
Measured submitted apps	88	119	125	332
Cost / measured submitted app	**$354**	**$350**	**$417**	**$376**

* Meta counts pixel application events, mostly application starts, on a traffic objective; not comparable to submitted applications. Quantcast is view-through, directional only. Measured submitted apps = Google + Azerion. Cost per measured submitted app = those channels' spend over their applications.

READ

The quarter delivered 332 measured submitted applications, June its best month (125), at a cost per submitted application that held in the $350-$420 band through a 2x scale-up. That efficiency hold is the core result of the quarter.

Azerion returned to form in June: 58 applications, up 35% on a 12% budget increase, at a $510 CPA (down 17%).

June's planned search scale-up surfaced the account's rank ceiling: 64-76% of available impressions are lost to ad rank against 9-13% to budget. The auction data now points the next dollar at bids, quality, and ad strength rather than budget.

Q1 VS Q2 · BLENDED FUNNEL (ORGANIC + PAID)

Four times the traffic, the same funded accounts.

Metric	Q1 (Jan-Mar)	Q2 (Apr-Jun)	Change
Unique Sessions	41,047	162,871	+297%
App Starts	6,997	7,974	+14%
Submitted	1,203	1,033	-14%
Live Apps Submitted	1,165	993	-15%
Approved	524	465	-11%
New Funded	148	146	-1%
New Traded	118	114	-3%

Client dashboard, calendar quarters, blended organic + paid.

READ

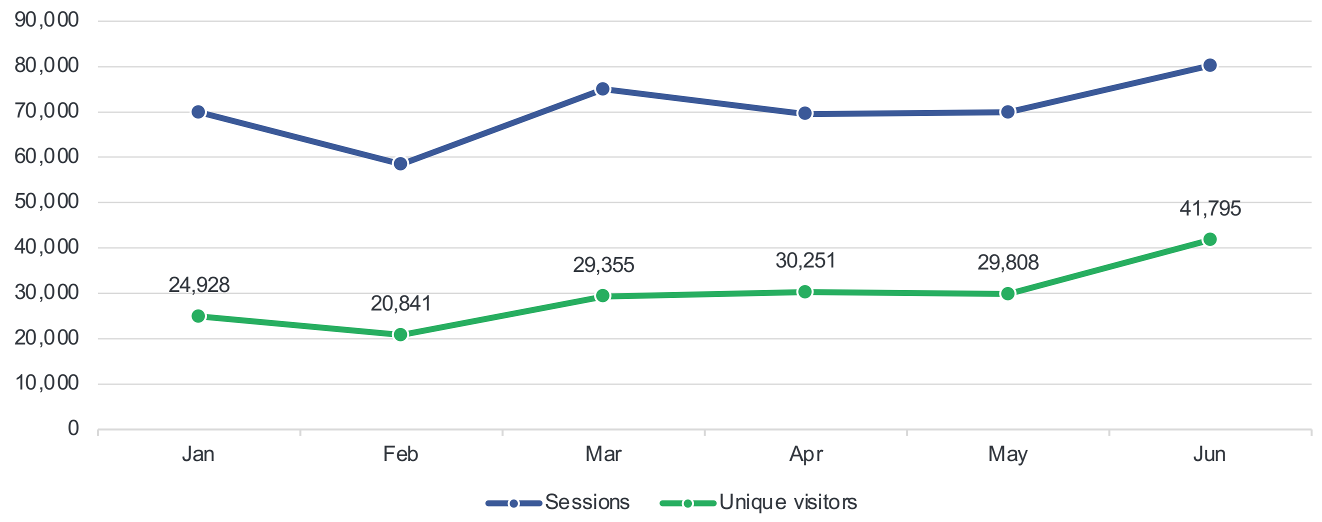
Traffic quadrupled quarter over quarter while application starts grew 14% and submissions fell 14%. Each funnel stage dampened the volume the media bought: the start rate diluted from 17% to 5% and the submit rate from 17% to 13%.

Approval, funding, and activation held steady through the scale-up; those stages run on the application-review and account-activation journey downstream of media.

The media mandate is qualified traffic and submitted applications at controlled unit cost. Converting starts into submissions is the joint funnel work on the July roadmap, and it is where the next accounts come from.

SITE TRAFFIC · SPANISH-LANGUAGE AUDIENCE (GA4, US)

The Spanish-language base held near 70K sessions and rose 15% in June.



WHAT IT MEANS

Media is expanding the audience: June brought the highest Spanish-language visitor count of the year.

Measurement is working: site analytics capture roughly 57% of paid social clicks as sessions, and search reconciles exactly.

The gap between traffic growth and application growth is a conversion problem, not a traffic or measurement problem, which is why the funnel work on the previous slide leads the recommendations.

THE READ

Spanish-language sessions on the US property held near 70K from January through May and rose 15% in June with the media scale-up; unique visitors rose 40% to 41,795. The traffic base under GCG is healthy and growing.

JUNE 2026 · EXECUTIVE SUMMARY

$117K deployed across five channels in June.

Channel	Spend	Impr	Clicks	Conv	CPA
Google Ads	$22,524	181,470	12,888	67	$336
Meta	$30,711	3.06M	74,572	136*	—
Quantcast	$30,559	37.2M	2,942	15 VT*	—
Azerion	$29,586	4.52M	19,653	58	$510
Native	$3,645	pilot	—	—	—
Total	**$117,024**	—	—	—	—

* Meta counts pixel application events (mostly starts) on a traffic objective. Programmatic view-through is directional only. Conversions use different events per channel and are never summed.

HEADLINES

June was the biggest GCG media month of 2026: $117,024 across five lines, up 53% from May. Azerion led conversion with 58 applications at $510 (+35%), search added 67 at $336, and the Native pilot entered the market.

WHAT THE DATA SAYS

The search scale-up surfaced the account's rank ceiling (67 applications at $336); the fix is ad-rank work, already scoped. Paid social scaled 151% with healthy delivery (71% of clicks became landing-page views). The reach line scaled 37% and its viewability fell to 46.9%, which the blocklist addresses.

JUNE PRIORITY

Shift paid social to the conversion objective, run the search ad-rank program before adding budget, and apply the programmatic blocklist with a viewability floor.

CONT' EXECUTIVE SUMMARY

Three moves shape July.

WHAT IS STILL FORMING

Search efficiency at scale. June proved the account is rank-limited: every campaign loses 64-76% of available impressions to ad rank and only 9-13% to budget. More budget at current ad rank buys worse auctions.

Paid social conversion measurement. Delivery and site capture are healthy, but the campaign still runs a traffic objective, so its 136 pixel events are mostly application starts rather than submitted applications.

The Native pilot. The June flight ($3,645) was an intentionally small first burn, below the volume for a meaningful cost-per-application read. The full pilot reports with July.

WHAT WE RECOMMEND

Complete the paid-social shift to a conversion objective and judge the channel on submitted applications from July.

Run the search ad-rank program on the proven TrackB terms: bid and quality work plus an RSA refresh, then scale into the recovered impression share.

Apply the 18-site programmatic blocklist (32% of June spend on that line) and set a campaign-level viewability floor.

Put the start-to-submit funnel step on the joint roadmap with the client; media is filling the top of the funnel.

berelvant

GOOGLE ADS · PERFORMANCE

67 submitted applications at $336. The scale-up mapped the rank ceiling.

SPEND	IMPRESSIONS	CLICKS	AVG CPC	SUBMITTED APPS	CPA
$22,524	181,470	12,888	$1.75	67	$336
+48% MoM	4 campaigns	CTR 7.10%	May: $1.53	May: 76	May: $200

Campaigns

Campaign	Spend	Clicks	Apps	CPA	Search IS
TrackA Trust	$7,796	5,712	18	$433	27%
TrackB Authority	$6,826	3,198	23	$297	24%
TrackB Platform	$4,489	2,568	17	$264	13%
Brand Search	$3,413	1,410	9	$379	11%

Impression share tells the story: campaigns lose 64-76% of available impressions to ad rank and only 9-13% to budget. Brand holds just 11% of its own auctions. The account has a large runway that budget alone cannot buy.

HIGHLIGHTS

All 67 conversions are submitted applications (Step 5 goal, definition unchanged from May).

TrackB stayed the efficiency core: Platform $264 and Authority $297. TrackA Trust converted at $433.

The 48% scale-up surfaced the ceiling: at current ad rank, incremental budget reaches lower-quality auctions. The auction data now maps exactly where rank work unlocks volume.

GOOGLE ADS · READ & RECOMMENDATIONS

Ad-rank work comes before added budget.

WHAT THE DATA SHOWS

May was the efficiency peak: 76 applications at $200. June's larger budget could not push past the auction ceiling: 67 applications at $336, with the data isolating ad rank, not budget, as the limiter.

Lost impression share is rank-driven everywhere (64-76%), not budget-driven (9-13%). The account cannot buy its way past ad rank at current bids, quality, and ad strength.

TrackB remains the proven converter set ($264-$297); Brand at 11% impression share is under-defended.

WHAT WE RECOMMEND

Run the ad-rank program before adding budget: bid up the proven TrackB terms, refresh RSAs to lift ad strength, and rebuild quality score on the Trust track.

Defend Brand: 11% impression share on brand terms leaves the highest-intent auctions to competitors.

Hold June budget levels while rank recovers, then scale into the impression share the rank work opens.

META · PERFORMANCE

Spend scaled 2.5x with clean delivery. The conversion objective is the July change.

SPEND	IMPRESSIONS	REACH	LINK CLICKS	LP VIEWS	PIXEL EVENTS
$30,711	3.06M	1.53M	74,572	52,639	136
+151% MoM	CPM $10.04	freq 2.0	CTR 2.44%	70.6% of clicks	starts rollup

Ad Sets

Ad set	Spend	Link clicks	LPV	Pixel events
trackA_pros_us_es	$16,924	35,710	25,078	84
trackB_pros_us_es	$17,787	38,862	27,561	52

June audience delivery reached 1.53M people at 2.0 frequency, the largest Spanish-language reach of any GCG channel with verified site arrival.

HIGHLIGHTS

Delivery held through a 2.5x scale-up: landing-page views ran at 70.6% of link clicks (May: 65.9%) and site analytics capture roughly 57% of clicks as sessions. Site analytics independently records 89 application starts from paid social in June.

The campaign still runs the Q2 traffic objective, so its 136 pixel events are mostly application starts. The conversion-objective shift is the unlock for judging this channel on submitted applications.

META · READ & RECOMMENDATIONS

Make the objective match the goal.

WHAT THE DATA SHOWS

The channel does what a traffic objective asks: low-cost, verified site visitors at scale, with 89 site-measured application starts in June. What it does not do yet is optimize toward applications, because the objective never asked it to. As an upper-funnel channel, its submitted applications largely credit to the search and direct visits that close them.

Every delivery signal supports the shift: stable CPM through the scale-up, improving click-to-LPV rate, healthy analytics capture, and a growing retargeting pool from four months of traffic.

WHAT WE RECOMMEND

Complete the shift to a conversion objective in July and judge the channel on submitted applications.

Seed the conversion campaigns with the pixel and the four-month retargeting pool before scaling prospecting.

Keep the trackA/trackB split so creative learnings carry over from the search program.

QUANTCAST · PERFORMANCE & READ

A deliberate reach month, with the same quality bill to manage.

SPEND	IMPRESSIONS	CPM	DEVICE REACH	VIEWABILITY	RESULTS
$30,559	37.2M	$0.82	23.2M	46.9%	15
+37% MoM	+38% MoM	May: $0.83	freq 1.6	70% standard	13 view-through

READ

The reach line scaled on purpose: 37.2M impressions to 23.2M devices at a flat $0.82 CPM.

Viewability fell to 46.9%, well under the 70% standard. We delivered an 18-site blocklist covering $9,752 (32%) of June spend on this line and recommend a campaign-level viewability floor to hold quality as reach scales.

Results rose 8 to 15, but 13 of 15 are view-through: directional support, not proven response.

TOP BLOCKLIST ENTRIES

yahoo.com $2,270 at 15.7% viewability; clarin.com $1,315 at 26%; weather.com $1,278 at 17.7%; genius.com $771 at 0.9%; zillow.com $685 at 5.6%.

The list ships with this report; applying it plus a viewability floor moves the line toward the standard without giving up the reach efficiency.

berelvant

AZERION · PERFORMANCE & READ

58 applications, up 35% on a 12% budget increase. Fewer starts, better starts.

SPEND	IMPRESSIONS	CLICKS	APP STARTS	APPLICATIONS	VIEWABILITY
$29,586	4.52M	19,653	447	58	58.8%
+12% MoM	CPM $6.55	CTR 0.44%	May: 1,398	$510 CPA	70% standard

Ad Sets (Applications)

Ad Set	Spend	Apps	CPA
Trusted Broker	$4,933	14	$352
Broker 1	$4,964	13	$382
Language Broker	$4,900	10	$490
Professional Tools	$4,940	9	$549
Spanish Platform	$4,933	7	$705
Trust HTML	$4,916	5	$983

READ

Applications rose 35% (43 to 58) at a $510 CPA, down 17%: the strongest converter of the June program.

Application starts fell 1,398 to 447 while completion improved from 3.1% to 13.0%, which is the start-to-submit fix May called for: fewer, better-qualified starts.

Delivery is confirmed US-only (state-level geo report). Viewability at 58.8% sits under the 70% standard; the 300x600 format converts best ($124 vendor-basis) and 728x90 worst.

Native pilot: $3,645 intentionally small first flight; full pilot read reports with July.

berelvant

CROSS-CHANNEL PRIORITIES + NEXT STEPS

Convert the traffic. Earn the rank. Guard the quality.

PRIORITY

Shift paid social to the conversion objective and judge it on submitted applications.

Put the start-to-submit funnel step on the joint roadmap; media is filling the top of the funnel and conversion is the constraint.

SCALING & OPPORTUNITY

Run the search ad-rank program (bids, quality, RSA refresh) on TrackB terms, defend Brand, then scale into the recovered impression share.

Hold the reach line at pace once the blocklist and viewability floor land.

TO CLOSE THE QUARTER

Carry the Azerion start-quality fix forward: completion tripled to 13% in June; concentrate budget on Trusted Broker and Broker 1 and push viewability over the standard.

The Native pilot reports in full with July: the June flight was an intentionally small first burn, judged then on cost per submitted application.

July priorities: the conversion objective on social, ad-rank work on search, the viewability floor on display.
